SUMMARY

Computer Science graduate (Cybersecurity) and an AI Enthusiast with customer-facing experience, strong written and verbal communication, and basic SQL and data-cleaning skills. Experienced in supporting and resolving issues for 500+ users, working with Python and API data, and coordinating cross-functional teams. Quick learner, available immediately; open to rotational shifts and weekends.

SKILLS

Data and Analysis: SQL Basics, Data Cleaning, Data Normalization, Python

Customer and Communication: Customer Support, Verbal and Written Communication, Issue Resolution, Documentation, Training

Tools and Methods: Microsoft Office, Agile Development, Project Coordination, Linux

EXPERIENCE

Lead Makerspace Manager | Hatch It! Lab, University of Tennessee at Chattanooga **Jan 2023 - Dec 2025**

- Trained 500+ students, faculty, and staff on equipment and safety, explaining technical procedures clearly to non-technical users.
- Supported lab users daily, answering questions and resolving equipment issues while maintaining high student satisfaction.
- Led a team of student workers to set efficient operating standards across five types of equipment.

Project Management Intern | Swaroop AI

Apr 2024 - Jun 2024

- Coordinated cross-functional teams (AI/ML, Data Science, DevOps, Media), serving as the central communication point across departments.
- Tracked timelines, resources, and deliverables to keep projects on schedule.

Member Service Assistant and Recreation Supervisor | Ignite, UTC

Oct 2022 - Jan 2024

- Provided in-person and phone customer support, resolving member concerns and disputes professionally.
- Conducted tours for 500+ visitors and handled membership sales exceeding \$500.
- Documented events and facility issues, and managed equipment rentals.

PROJECTS

Data Cleaning and SQL Practice | Self-directed

- Cleaned [Netflix TV Shows and Movies] using [Python and Excel], handling missing values, duplicates, inconsistent formats and balancing database.

Car Reliability Analyzer (Backend Engineer)

- Integrated NHTSA vehicle datasets through APIs and normalized the data for reliability scoring and analytics, using Python.

SECCDC Blue Team Competition

- Worked in a team of six to keep critical services running under active attack among 38 competing teams, and documented incident response actions.

EDUCATION

Bachelor of Computer Science, Cybersecurity | University of Tennessee at Chattanooga | **Aug 2022 - Dec 2025** | GPA 3.52/4.0

Weltec Institute of Technology | Data Science | **May 2026**

CERTIFICATION

Google Cybersecurity Certificate | Internshala Cybersecurity Certificate
